

Bob and Sue Gregg's 2022 Family Journal

For quite some time we have been planning to re-landscape our front yard and replace the driveway. Our goal was to complete the work in early spring. First, the old wood timber retaining wall was removed and replaced with textured concrete paving blocks. The side yard was rebuilt and the old driveway was demolished. A new driveway was poured and we were on our way. After the concrete cured, the demolition of the front yard began. We kept the original layout but replaced the walk with crushed stone and several underground drains. Finally, the yard was replanted and we look forward to watching the foliage grow over the years. Mission accomplished!

Jen is still residing in Dacula, Georgia and working at CNN. She continued splitting her work time between going into CNN Center and working from home. She is feeling fortunate that she survived another round of layoffs and celebrated her 27th year with CNN. She also continued to enjoy volunteering at PAWS Atlanta where she photographed, shot and edited video. This year she welcomed Cody, a male Great Pyrenees into the G Pack, and sadly said goodbye to Lovie, her senior 16 year old shepard mix.

Bob's sister, Ree still lives in Powder Springs, Georgia with her dog Lily. She was given the name Ree when Jen was a toddler and couldn't pronounce Marie, and she was known as Ree from then on.

Alyssa had a successful first year at Syracuse University in the school of Journalism. She worked in the Carrier Dome during sporting events there. She spent several weeks with us after the semester ended. While she was here, we went to the High Museum of art and relaxed.

Our spring trip to Myrtle Beach was canceled when Sue injured her left knee. She spent a successful month in rehab. Since she had her right knee replaced three years ago, we thought it would be a good idea to install a stair lift for the future. The hardest part of the post surgery was walking up and down the stairs.

Bob and Jen ran/walked the Peachtree 10K again this year. They also hiked Red Top Mountain with Cheyenne. Bob still takes his morning neighborhood runs and Bob and Sue continue their morning mall walks. Bob, Sue and Jen rode the Blue Ridge Scenic Rail Road (BRSRR) in north Georgia again this year.

Over the summer, Bob had an inguinal hernia repaired. The doctor used robotic surgery for a successful out patient procedure. The hernia was diagnosed several years ago but it became apparent that a repair job was in order. It was a minimally invasive procedure and Bob recovered quickly.

Bob and Jen drove to Athens, Georgia in the fall for the University of Georgia and Kent State football game at Sanford Stadium. Jen's friend gave her the tickets, which were on the fifty yard line. Best seats we ever had and Georgia won.

Our trip to Myrtle Beach in the fall was eventful, since we celebrated the sixtieth anniversary of our first date at the University of Illinois at Urbana, Illinois. We went to our favorite restaurant in Myrtle Beach, the Sea Captain's House. We enjoy the fried oysters, shrimp and grits and jambalaya. The Cardinal fifth-wheel will be fifteen years old this year.

After we returned home from Myrtle Beach, Jen Bob and Sue went to the Chic-Fil-a corporate headquarters for a tour of the campus, called the Backstage Tour. We had Easter, Thanksgiving and Christmas with Jen and Ree.
